

macromedia® FLASHPAPER2

DATA SHEET

Convert files into web-ready Flash documents or PDFs

FlashPaper 2 allows anyone to convert printable files into Macromedia Flash documents or PDFs with one click. Instantly generate Flash documents that can be accessed by over half a billion web users. Or, transform files into secure, compact PDFs for emailing, archiving, and printing. Macromedia FlashPaper 2 is an affordable solution to easily create web-ready documents that can be shared across the web.

Web-Ready and Ubiquitous

Revolutionize web document creation

FlashPaper generates compact, fast opening Flash documents that can be published to any website using Macromedia Contribute, Dreamweaver, or any other HTML tool. FlashPaper creates Flash documents through intuitive Microsoft Office integration and file drag-and-drop.

Instantly present information to over half a billion web users

Create Flash documents that are immediately available cross platform on any web browser. Compact Flash documents open within a web page, eliminating the need for a separate viewer application. Flash documents can also be incorporated into Flash projects to give information solid structure.

Customize the web document experience

Empower Flash developers to manipulate the Flash document user interface. With FlashPaper, Flash designers can customize the Flash user interface to match site look and feel, as well as load and control the documents in Flash projects.

Standardized and Compact

Simplify PDF creation for non-technical users

Anyone can instantly create PDFs in one simple step. Generate secure, compact PDF documents from any printable file with the touch of a button, totally integrated into Microsoft Office menus.

Protect sensitive business information online

FlashPaper generates PDF output with comprehensive PDF security. Easily create PDFs with 128-bit encryption and two levels of password protection to secure documents from unauthorized viewing, editing, copying, and printing.

Share web documents by email

Advanced Microsoft Office integration in the form of toolbar buttons and menus allows users to instantly create and email a PDF version of any MS Office file with one click.

Flexible Deployment

Use Microsoft Office applications to create rich web documents

Easily create and share Flash documents and PDFs with intuitive Microsoft Office integration. FlashPaper creates Flash documents and PDFs directly from within Word, Excel, and PowerPoint.

Promote universal document accessibility

Flash documents created with FlashPaper are 508 compliant and cross-browser, cross-platform, and cross-device compatible. FlashPaper documents offer comprehensive navigation and content access via live hyperlinks, bookmarks, and text search and selection.

Make FlashPaper documents available to anyone

Post documents on the web using Macromedia Contribute, Dreamweaver, or any other HTML tool. Create FlashPaper documents by dragging-and-dropping within Contribute.

Microsoft Office Integration

Tight Microsoft Office Integration

Instantly create Flash Documents, or create and email a customized PDF file within any Microsoft Office document using intuitive toolbar buttons or drop down menu choices.

Document Creation and Emailing

Drag and Drop Web Document Creation

Drag and drop any printable file into the open FlashPaper application window to effortlessly create a customized FlashPaper or PDF version of the original document.

Instant PDF Emailing

Integrated Microsoft Office toolbar buttons and drop-down menus let users create and email PDFed versions of any open Microsoft Office document with a single click.

Web-Ready Flash Documents

Web-Native Documentation

Use incredibly lite, web-friendly Flash documents that open within a web page to instantly present information to all end users.

Universally Consumable Web Documents

Flash documents are viewed using any web browser, allowing information to be consumed by over half a billion web users—without the need for a separate viewer application or requiring the application that created the original document. Flash documents can be added to any Flash project.

Cross-Compatible Format

Flash documents are completely cross-browser, cross-platform, and cross-device compatible so information can be viewed from any setup.

Publish Flash Documents to the Web

Easily publish FlashPaper Flash documents to the web using Macromedia Contribute, Dreamweaver, or any other HTML tool.

Full-featured PDF Documents

Create Compact, Robust PDFs

FlashPaper instantly generates compact PDFs from any printable file with one click. FlashPaper PDFs are perfectly suited for emailing, printing, or archiving information “offline”.

40 and 128 Bit PDF Security

Completely customize PDF security via 40 or 128-bit encryption, two levels of password protection, and a variety of permissions.

Comprehensive Document Navigation

Complete In-Document Hyperlinking

FlashPaper Flash and PDF documents maintain all source document hyperlinks, including literal URLs, embedded URLs, and linked images.

Maintain Document Bookmarks

Flash and PDF documents generated using FlashPaper automatically retain bookmarks from Microsoft Office documents.

Retain MS Word Cross-Links

FlashPaper documents automatically preserve Word document cross-links and table of contents links.

Customization and Advanced Features

Customize the web document experience

Empower Flash developers to manipulate the Flash document user interface. Flash designers can load and control documents in Flash projects and customize which user interface elements are displayed with an updated ActionScript API.

In-Document Text Search

FlashPaper allows complete text searching within Flash documents, making it simple to find specific words or phrases.

In-Document Text Select and Copy

Select and copy any portion of text in FlashPaper documents without text re-flow or formatting issues.

Volume Deployment

Easy Volume Deployment

FlashPaper supports most common software delivery methods and can easily be implemented across an organization.

Aggressive Volume Pricing

Macromedia offers FlashPaper at a heavy volume discount for organizations to empower any number of employees to create Flash documents and PDFs in one click.
